

2021 Spring Rowing Season (March-May)

We are planning to have a season that includes sweeping in team boats (4s + 8s sweep) *and* sculling in singles. Due to Covid Restrictions, we will implement very strict policies to ensure this can happen safely. Because of the potential for unexpected disruptions in the season, we will break the season down into two 5 week sessions (3.8-4.9.2021 + 4.12-5.14.21)

Team Boats: \$500 for each 5 week Session (3.8.2021-4.9.2021 + 4.12.2021-5.14.2021)

Practice daily M-Th (potentially some Fridays for Varsity Rowers) for 2+ hours bw 4-7pm (Exact times will be determined based on numbers (rowers, varsity vs novice, sweepers vs. scullers, etc.). Space may be limited, so please register early. *Tuition is non-refundable.*

Singles Sculling Sessions: Cost TBD (depending on numbers)

Individual or small group Learn-to-Row + Practice Sessions 3-4 days a week (including weekends).

New Covid Policies: (These are fluid and may change based on Data & CDC Recommendations)

- Rowers will be required to show a negative Covid test before they start the season.
- Rowers will be required to fill out daily health checks on TeamSnap before practices.
- Rowers are **required** to wear a mask at all times and even encouraged to wear two masks² (AJR will provide one 3D plastic bracket mask insert to each rower.) Coxswains will wear² masks and shields. [CDC Mask Guidelines](#)
- Rowers will follow strict rigging and launching protocols (established to maintain social² distancing where possible).
- If a rower is exposed or tests positive, their entire boat will have to follow CDC quarantining² guidelines.
- Rowers will not be reimbursed for missed practices due to Covid exposure (but we will look² for ways to make up for lost time, when applicable.)

Additional Requirements:

DDDDDD

Payment Options: (electronic payments preferred)

Via Venmo: Pay to @ThompsonDD (#0493)

Via Paypal*: Pay to annapolisjuniorrowing1@gmail.com. **Please include transaction fee of \$15*

Via Check: Written to Annapolis Junior Rowing and handed to a coach or mailed to P.O. Box 6804, Annapolis, MD 21401.

Questions: Email Annapolisjuniorrowing1@gmail.com or call 703/408-0493.

Register Here: [2021 Spring Rowing Season Registration](#).

COVID-19 Awareness
Parent/Student-Athlete Participation Acknowledgement Statements

I _____, the parent/guardian of _____, acknowledge that I have received information on all of the following:

- What you should know about COVID-19 to protect yourself and others
- Share facts about COVID-19
- Multisystem Inflammatory Syndrome in Children (MIS-C)
- COVID-19 Frequently Asked Questions from the Maryland State Health Department.
<https://coronavirus.maryland.gov/#FAQ>

I _____, the parent/guardian of _____, will follow the requirements for in-person attendance at any extracurricular athletic and activity event.

- I will not send my child to extracurricular athletic and activities if they are exhibiting any signs/symptoms of COVID 19 or have been exposed to someone with COVID 19 (or presumed to have COVID 19) in the past 14 days.
- I will review symptoms with my child and monitor my child's symptoms every day that my child attends in-person activities/events.
- If my child becomes ill during any in-person activity/event, I will ensure they are picked up promptly. I will follow-up with an authorized health care provider/health department and comply with recommended quarantine or isolation as directed. If my child is ill, I understand that a release to return to in-person activity from an authorized health care provider will be required.

Signs and Symptoms of COVID-19:

- | | |
|---|------------------------------|
| • Fever (100.4°F or greater) or chills | • Headache |
| • Cough | • New loss of taste or smell |
| • Shortness of breath or difficulty breathing | • Sore throat |
| • Fatigue | • Congestion or runny nose |
| • Muscle or body aches | • Nausea or vomiting |
| | • Diarrhea |

Students must be free of fever without the use of fever reducing medications.

What you should know about COVID-19 to protect yourself and others

Know about COVID-19

- Coronavirus (COVID-19) is an illness caused by a virus that can spread from person to person.
- The virus that causes COVID-19 is a new coronavirus that has spread throughout the world.
- COVID-19 symptoms can range from mild (or no symptoms) to severe illness.

Know how COVID-19 is spread

- You can become infected by coming into close contact (about 6 feet or two arm lengths) with a person who has COVID-19. COVID-19 is primarily spread from person to person.
- You can become infected from respiratory droplets when an infected person coughs, sneezes, or talks.
- You may also be able to get it by touching a surface or object that has the virus on it, and then by touching your mouth, nose, or eyes.

Protect yourself and others from COVID-19

- There is currently no vaccine to protect against COVID-19. The best way to protect yourself is to avoid being exposed to the virus that causes COVID-19.
- Stay home as much as possible and avoid close contact with others.
- Wear a cloth face covering that covers your nose and mouth in public settings.
- Clean and disinfect frequently touched surfaces.
- Wash your hands often with soap and water for at least 20 seconds, or use an alcohol-based hand sanitizer that contains at least 60% alcohol.

Practice social distancing

- Buy groceries and medicine, go to the doctor, and complete banking activities online when possible.
- If you must go in person, stay at least 6 feet away from others and disinfect items you must touch.
- Get deliveries and takeout, and limit in-person contact as much as possible.

Prevent the spread of COVID-19 if you are sick

- Stay home if you are sick, except to get medical care.
- Avoid public transportation, ride-sharing, or taxis.
- Separate yourself from other people and pets in your home.
- There is no specific treatment for COVID-19, but you can seek medical care to help relieve your symptoms.
- If you need medical attention, call ahead.

Know your risk for severe illness

- Everyone is at risk of getting COVID-19.
- Older adults and people of any age who have serious underlying medical conditions may be at higher risk for more severe illness.

Share facts about COVID-19

Know the facts about coronavirus (COVID-19) and help stop the spread of rumors.

FACT
1

Diseases can make anyone sick regardless of their race or ethnicity.

Fear and anxiety about COVID-19 can cause people to avoid or reject others even though they are not at risk for spreading the virus.

FACT
2

For most people, the immediate risk of becoming seriously ill from the virus that causes COVID-19 is thought to be low.

Older adults and people of any age who have serious underlying medical conditions may be at higher risk for more serious complications from COVID-19.

FACT
3

Someone who has completed quarantine or has been released from isolation does not pose a risk of infection to other people.

For up-to-date information, visit CDC's coronavirus disease 2019 web page.

FACT
4

There are simple things you can do to help keep yourself and others healthy.

- Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing; going to the bathroom; and before eating or preparing food.
- When in public, wear a cloth face covering that covers your mouth and nose.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.

FACT
5

You can help stop COVID-19 by knowing the signs and symptoms, which can include:

- Fever
- Cough
- Shortness of breath

Seek medical attention immediately if you or someone you love has emergency warning signs, including:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion or not able to be woken
- Bluish lips or face

This list is not all inclusive. Please consult your medical provider for any other symptoms that are severe or concerning.

Multisystem Inflammatory Syndrome in Children (MIS-C)

Updated May 20, 2020

MIS-C is a severe inflammatory syndrome where pediatric patients present with features similar to Kawasaki disease and toxic shock syndrome. The condition can cause problems with the heart and other organs and may result in hospitalization.

MIS-C appears to be rare and most children who get COVID-19 will not develop MIS-C, according to the Centers for Disease Control and Prevention (CDC). However, children with this syndrome may become seriously ill. If you have any concerns about your child's health, please call your child's doctor.

What are the symptoms of MIS-C?

Symptoms of MIS-C might include persistent fever (temperature of 100.4 degrees F or 38.0 degrees C or greater), a rash or changes in skin color, red eyes or conjunctivitis, red cracked lips or red, bumpy tongue that looks like a strawberry, swollen hands and feet, abdominal pain or swollen lymph nodes.

When should I get emergency care?

Call your child's doctor and seek immediate care if your child has:

- Persistent fever for several days
- Difficulty feeding (infants) or is too sick to drink fluids
- Severe abdominal pain, diarrhea or vomiting
- Dehydration with decreased frequency of urination
- Change in skin color or appearance — becoming pale, patchy or blue, swelling
- Trouble breathing, breathing is painful or breathing very quickly
- Racing heart or chest pain
- Acting unusually sleepy, dizzy or confused

If your child is severely ill, go to the nearest emergency room or call 911 immediately.

Is MIS-C contagious?

MIS-C is not contagious, but it is possible that your child has COVID-19 or another infection that may be contagious.

Is there a treatment for MIS-C?

Children with MIS-C are being treated with therapeutic medications to support the body's immune system and inflammatory response. Children may also receive medications to protect their heart, kidneys and other organs.

How can I prevent my child from getting MIS-C?

You should take steps to prevent your child from being exposed to COVID-19. Stay home when you can, practice social distancing and wear a mask if you must go out and wash hands frequently. Children with underlying medical conditions can be at higher risk for poor outcomes of COVID-19.
